

3 PAGE SUMMARY 2025-2027

SGM MARKETING AND SALES STRATEGY

SGM MISSION: Helping farms thrive while fostering a vibrant floral community and marketplace.

SGM VISION: To facilitate collaboration between farmers, florists, and floral enthusiasts to imagine and build systems and communities that thrive in reciprocity with the natural world.

BRAND VALUES: Cooperation, uniqueness, community, innovation, creativity, resilience, interdependence, excellence, quality, beauty, culture, empathy, connection

PURPOSE: Build a *resilient* floral economy in the Pacific Northwest, through:

- Increased access, sales, and distribution of regionally grown specialty cut flowers with a *strategic* cooperative approach
- Enhance the well-being of our local communities by providing a *high-quality, extraordinary floral selection* that celebrates and connects us to our regional climate and biodiversity
- *Reduce the social and environmental impact* of industrial agricultural practices and global supply chains
- Foster and support an *imaginative floral community* committed to *planetary wellness* through educational opportunities, print, and digital resources

TARGET AUDIENCES

- **B2B - Wholesale Buyers (WB)**- Event Florists, Retail Florists, Business Owners
- **B2B - Grocery Buyers (GB)**- Floral Department Managers - Northwest Grocery Stores
- **B2C - Public Customers (PC)**- Hobbyists, Beginner Florists, Artists, Nature Enthusiasts
- **B2B/C - Flower Farmers (FF)**- Regional, National/International Growers and enthusiasts

GOALS

1. Increase brand awareness and interest across target audiences
2. Identify new opportunities to expand sales opportunities for Member-Growers
3. Strategically use customer feedback to inform and expand Member-Grower opportunities and product offerings through the Market
4. Continue to increase customer satisfaction and improve customer retention

OBJECTIVES

1. Increase Brand Awareness and interest across target audiences through development and integration of a consistent brand identity across digital platforms and retail spaces (Greater-Seattle Area Wholesale Buyers, Grocery Stores, and Retail Customers)

- Revise Mission and Vision Statements for the Market
- Develop a visual brand identity that embodies the value and quality of our products, inspires creativity, evokes curiosity and play, and ignites reverence for the natural world

- Clarify brand positioning and Unique Value Proposition (UVP)
- Redesign website for enhanced Search Engine Optimization (SEO) through concise, image-forward, high-quality content, keyword optimization, and improved web structure
- Leverage social media channels and paid advertising to increase reach/engagement, capture leads, and drive reengagement
- SGM-branded merch and vehicle branding
- Re-engage customers through remarketing email campaigns, promotions, and special offers
- Enhance packaging and create signage packages for grocery and retail partners
- Identify brand partners for paid ads and word-of-mouth marketing

2. Identify new opportunities to expand sales opportunities for Member-Growers and launch new programming to increase reach and nurture customer relationships

- Annual Slow Flowers Plant Sale with Slow Flowers
- Northwest Flower and Garden Festival
- Floral Design/Botanical Workshops (1x a month)
- Coffee and Cut Flowers
- Farm/grower Workshops/seminars

3. Strategically use customer feedback to inform and expand Member-Grower opportunities and product offerings through the Market

- Set SMART Goals (Specific, Measurable, Achievable, Relevant, and Time Bound) for each audience
- Conduct competitor analysis to inform strategy, enhance brand positioning, and products and services offered
- Launch new product offerings based on customer feedback (hard goods, botanical-related makers and creators' items, and workshops)

4. Continue to increase customer satisfaction and improve customer retention through customer analysis and enhancing customer experience

- Optimizing customer journeys online and in-store – reducing customer touchpoints for a seamless shopping experience
- Increase worker efficiency through system automation, supportive print materials and signage, and increase staff capacity for customer care
- Establish customer feedback channels through targeted surveys to continue identifying customer pain points and opportunities
- Create Customer Personas using available data that represent each audience, their needs, objectives, and where they hang out online
- Evaluate current Customer Journeys and continue finessing

ROADMAP

YEAR 1 - 2025

- Rename, Revised Mission/Vision, Brand, and Website Development
- Pilot new programming - Workshops (sold out each event), Farmer/florist socials (requested back in our customer service satisfaction survey), Plant Sale (200 public transactions)
- Maintain social media presence – goal to post on grid 2-3 times a week, resulting in a 1700 + follower increase since Jan 2025
- Develop plans for redesigning the storefront and interior

YEAR 2 - 2026

- Launch new website/branding
- Maintain and expand social media presence – goal to post on grid 2-3 times a week
- Implement brand elements across platforms and storefront as cash flow allows
- Customer and competitor analysis
- Enhance product packaging and create signage packages for grocery and retail florists to have in-store on their web platforms
- Email marketing with content tailored for each audience (public, wholesale, grocery)
- Increase product awareness with color-accurate product photography
- Identify advertising opportunities and brand partners
- Refresh storefront and entry with way-finding for customers

YEAR 3 - 2027

- Expand Programming: Workshops, Plant Sale, Farm/grower Workshops/seminars
- Expand social media platforms to include Pinterest and YouTube
- Floral Standards Second Edition with updated photos
- Create and roll out online resources for floral enthusiasts
- Build on the success of 2026 NWFGS participation, and optimize similar opportunities at tradeshow and networking events

Thanks so much for putting this together! I'd like to see measurable ways that we will be tracking all of these efforts so we can use data to drive our decisions on how we use our time and resources moving forward.

Agreed with Lexi! And this is an amazing outline with great ideas so far. Thanks!

Reporting Goals

Reporting Goals for the Marketing and Sales Strategy

REQUESTS FROM BOD:

- Setup a Baseline of **Measurable Stats** to observe growth and ROI resulting from the Marketing Strategy
- We understand that Marketing Strategy success is both Quantitative (direct sales/customer signups) and Qualitative (Brand Awareness / Customer Experience etc) - how to track and consider both of these?
- Understand that Marketing Results come over time - but is there a way to set targets?
- How to assess our growth opportunities with informed research (data on industry and consumer trends, where are our potential customers and how do they want to connect / shop with us?)

[[Notes / Ideas from Alyssa:]]

- Develop a Baseline Report - start capturing numbers to observe growth as a result of marketing strategy
 - You know better than me what analytics we have access to, but choose an overview of the most relevant digital marketing data, (website visits and social media stats). Anything that links them to conversions (sales, or new customer signups, etc)
 - How often do we want to see this? Annually? Quarterly?
- Show some \$ in the Marketing Plan and/or Baseline Report
 - Costs Versus Projected Return on Investment
 - Return on Investment can also be Qualitative - smoother customer experience/ customer retention (are we seeing customers return for more frequent orders as a result of any wayfinding updates? Any customers who haven't placed an order for a while starting to order again? Any way to see this and put data to it?)
 - **Specific Examples called out in May BOD Meeting:**
 - Track costs of selling to Mass Merch through the winter months (selling at a loss with CA crop?) - Give us some numbers and reporting to analyze ROI on this, and does it really pay off to keep these customers in winter for higher member sales in season?
 - Track costs of events like workshops or the plant sale and ROI on that?
 - Costs should also consider asks from member growers (time donated, etc)
- Need for larger-scale Industry Analysis
 - Where and who are potential new customers according to facts and data
 - Does our marketing strategy align with this?
 - Do the target customer groups create sales opportunities **all** the varied member farms (not only focusing on growth in mass merch, for example)?
 - Changes in the wedding/event industry... any ideas on how to find data on this and make sure we're marketing in a way that stays relevant? Data on average

wedding budget trends... floral shops opening/closing in the area, spending habits, competitor analysis... etc

- Research into resources for this... Would it be worth it to hire out or purchase reporting for a big picture look at relevant industry trends?
